Thomson Reuters/Jefferies CRB Wildcatters Energy E&P Equity Index

Index Performance. The Thomson Reuters/Jefferies CRB Wildcatters Energy E&P Equity Index (TICKER: WCAT) declined -10.60 from 2399.12 to 2144.71 in the second quarter of 2010. This compares to a rise in the Henry Hub Natural Gas Spot Price Index (TICKER: NGUSHHUB) of +15.18% and a decline in the S&P 500 (TICKER: SPX) of -11.86%.

The best performing stocks were Mariner Energy Inc (TICKER: ME US), which rose +43.49%; Magnum Hunter Resources Corp (TICKER: MHR US), which rose +43.42%; and PetroQuest Energy Inc (TICKER: PQ US), which rose +34.39%. The worst performing stocks were Houston American Energy Corp (TICKER: HUSA US), which declined -45.67%; ATP Oil & Gas Corp (TICKER: ATPG US), which declined -43.70%; and BPZ Resources Inc (TICKER: BPZ US), which declined -43.54%.

The Thomson Reuters/Jefferies CRB Wildcatters Energy E&P Equity Index is down -5.63% year-to-date and up +45.10% over the past 12 months.

Index Description. The Thomson Reuters/Jefferies CRB Wildcatters Energy E&P Equity Index (TICKER: WCAT) is an equity index designed to serve as a benchmark for small-cap and mid-cap American and Canadian companies that are principally engaged in the exploration and production of natural gas and oil.

Inclusion Criteria. All WCAT constituents are "principally" engaged in exploration and production of natural gas and oil. For the purposes of WCAT, all constituents must generate more than 75% of annual revenues directly from participation in this industry. WCAT contains stocks selected from a universe of 300 exploration and production stocks domiciled in the United States and Canada that pass applicable revenue tests. Stocks must have a market capitalization between USD 200 million and USD 2 billion to be eligible for inclusion in the index. In addition, companies representing at least 95% of the total weight of the underlying index must have an average daily turnover for the previous ninety days of more than USD 1 million.

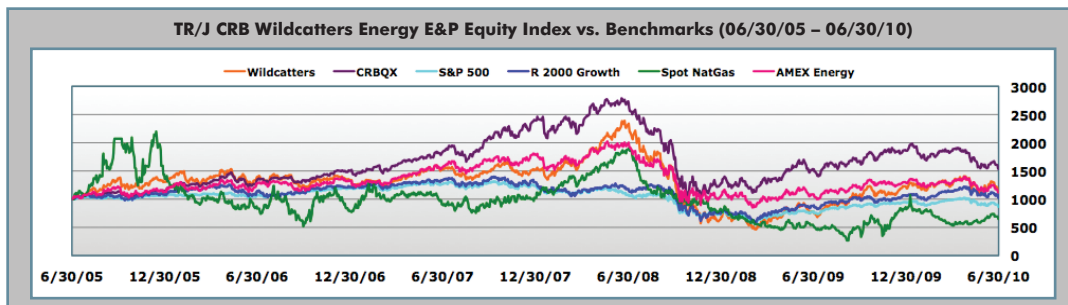

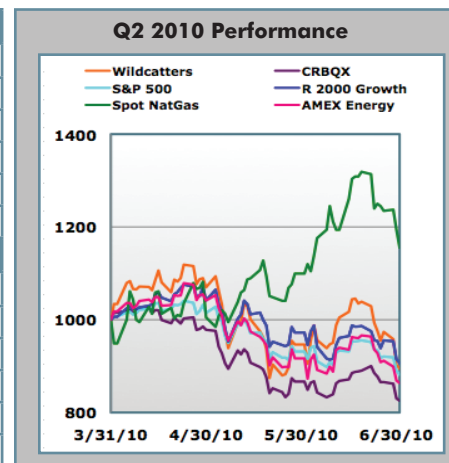

Weighting Methodology. WCAT employs a capitalization weighted methodology, adjusted for free float. Weightings are capped and adjusted for UCITS and RIC concentration (25/5/45). WCAT is rebalanced quarterly on the third Friday of the last month of each calendar quarter.

Index Data. WCAT currently contains 67 constituents and is calculated in real time by Thomson Reuters. Index values are distributed throughout the day at fifteen second intervals in U.S. Dollars. WCAT is calculated on both a price only and total return basis. Daily values are available from December 31, 2003.

Index Rationale. "Wildcatters" are small-cap and mid-cap US and Canadian exploration and production companies, with operations primarily focused on North American natural gas. Because of their comparatively modest proved reserves, new discoveries often have a material impact on performance. This segment of the natural gas industry is expected to benefit from a) rising demand for natural gas due to the fuel's relatively low carbon footprint (~45% CO2 compared to coal), b) improved extraction technologies for shale and coal bed methane, and c) the opening up of sizeable new fields. Dominated by small cap companies, this index tends to be more volatile than other energy indexes, which are dominated by large integrated oil and gas companies.

Leading Movers				
Company Name	Ticker	Opening	Closing	Change
